What's This I Hear About Futures?

Sunny J. Harris

June 8, 2021 8:00am PST

Also Known As

Futures Trading for the Un-Initiated

My Passion is Helping Beginners

- And Intermediate Traders
- This talk is for:
 - Traders who have not tried Futures
 - People who have not traded much and want to learn
 - Thus, for beginners of both types

I am a Trader

- And have been for 40+ years
- I trade Futures, Stocks, ETFs & Crypto
- I do not trade Options. I only know how to lose with options
- I'll tell you a bit about myself, but
 - First let me show you how I trade

What I Trade

- S&P 500 futures contract
 - 1 min & 5 min charts
- Long-term stock holdings
 - A week or more
- ETFs long-term
- And a little bit of crypto currencies

My DMA_H & SunnyBands

ETFs vs Underlying vs Futures

SP500 w SunnyBands & DMA_H

And if we look Closely

This is the kind of insight

- You can get for FREE by Signing up for my free Sunday night “Sunny Side of the Street”
- The link was in the email I sent out
- Email me if you can't find it
- OR click above

Quick Overview

#1 Trader
1994 & 1995
With 365.4%
and 178% profit

Using SunnyBands
and my DMA
(Dynamic Moving
Average)

EQUITY-BASED CTA RANKING

Top 100 Most profitable CTAs for 1994 managing under \$10 Million

Advisor Name and Group Rank	VAMI Return	Overall Rank	Equity Return	Overall Rank	Net Profit (Millions \$)

Sunny Harris

Just now · 

On 5/1/21 I posted I tho't Dow would correct to 33,563. It beat that today with a low of 33,473.80. The Fibonacci 61.8 extension from the March 2020 low is 33,329. We could still drop to that level. Note that SunnyBands lower-inner band was touched, but the move looks like it could correct to the lower-outer band at 33,053. Be wary.

Accessing My FREE Predictions

- If you go to [Facebook](#) and look for [Sunny Harris](#) you'll see where I post my FREE market predictions as I see them
- You can Also Opt-In for my FREE “[Sunny Side of the Street](#)” [here](#), Sunday night newsletter
- I've called for rising markets when everyone else was watching for a crash
- I've called for corrections when everyone else was buying
- AND, all new [www.moneymentor](#) has been released

So...What Are Futures?

- aka Derivatives (bc value derived from the underlying)
- They are not like stocks in some ways
- They are like stocks in other ways
- If you own a stock you own a small piece of a real company & can hold forever
- Stocks don't usually drop to \$0
- If you trade futures you are buying a contract to take delivery of a commodity at a later date
- And you could lose more than your initial investment

Trading on Margin

- You can buy stocks; and if you want to set up a margin account and the stock is “borrowable” then you can short them
- You will have a margin account if you trade futures: you are borrowing money from the exchange
- What is “shorting”?
- Long is buying in hopes it will go up and you can profit
- Short is selling something you don’t own on the promise you’ll buy it back later on the hope it will go down

Chart of “long” Trades

Chart of “short” Trades

Why “ ”

- You can't really trade the Dow Jones Index of 30 stocks
- It's just a measuring stick
- So, to go long and short like that you need a tradable instrument
- These days there is a futures contract called YM that you can trade

Let's put YM on a Chart

Why?

- Futures contracts expire on a regular interval, often every 3 months
- In order to view the symbol on a chart you need to know when it expires and use the code for that month & year

CME Futures Symbols

CHICAGO MERCANTILE EXCHANGE (CME)

	SYMBOL	DELIVERY MONTHS	TRADING HOURS (ET)
AUSTRALIAN DOLLAR	AD	H,M,U,Z (cash = A)	08:20 AM - 03:00 PM
BRITISH POUND	BP	H,M,U,Z (cash = A)	08:20 AM - 03:00 PM
BRITISH POUND, rolling spot	RP	H,M,U,Z (X = daily adj)	08:00 AM - 03:00 PM
CANADIAN DOLLAR	CD	H,M,U,Z (cash = A)	08:20 AM - 03:00 PM
CATTLE, Feeder	FC	F,H,J,K,Q,U,V,X	10:05 AM - 02:00 PM
CATTLE, Live	LC	G,J,M,Q,V,Z	10:05 AM - 02:00 PM
D-MARK/YEN (settled in yen)	DJ	H,M,U,Z	08:20 AM - 03:00 PM
DEUTSCHE MARK	DM	H,M,U,Z (cash = A)	08:20 AM - 03:00 PM
EURO DOLLAR	ED	H,M,U,Z (cash = A)	08:20 AM - 03:00 PM

September	U
October	V
November	X
December	Z

moneymentor.com/reference

FORMATS FOR ENTERING SYMBOLS:

In the formats that follow, a + (plus sign) is used only as a unit separator, and is not an actual part of the symbol format. The + character is used to make reading the formats easier. Do not type + when it appears.

Symbol Type	Format	Example
Common Stocks	SYMBOL	XYZ
Common Stock for Specified Exchange	SYMBOL + & + CLASS	XYZ&N
Class	SYMBOL + / + CLASS	XYZ/B
Preferred	SYMBOL + p + CLASS (if any)	XYZp or XYZpA
Rights	SYMBOL + r	XYZr
Warrants	SYMBOL + /WS	XYZ/WS
When Delivered	SYMBOL + /WD	XYZ/WD
When Issued	SYMBOL + w	XYZw
International	SYMBOL + . + Countrycode	XYZ.CA
Canadian Debenture Bonds	SYMBOL + d + CLASS (if any) + . + CA	MRIdU.CA TBCd.CA CFEdB.CA
Canadian Installment Receipt	SYMBOL + i + CLASS (if any) + . + CA	STUi.CA

The Reason for this is:

- Futures contracts expire on a regular interval, often every 3 months
- Sometimes more often
- History
 - Futures used to be crops and animals
 - Crops came to market every 3 months
 - Animals were born & matured every 3 months

Futures Expiration Month Codes

Month	Code
January	F
February	G
March	H
April	J
May	K
June	M
July	N
August	Q
September	U
October	V
November	X
December	Z

Most Important
for Futures Traders:

Code	Month
H	March
M	June
U	September
Z	December

Now We Can Look at YM Again

- The current expiration month for YM is June (since March has past)
- And the year is 2021
- So we construct:
YMM21
 - YM is the contract
 - M is the month
 - 21 is the year

And now here's the chart

What Does “Delivery” Mean?

- In the old days the exchanges physically delivered the commodity to your doorstep
- They still do for some contracts
- But, for others they simply cash you out of your position, win or lose
- Imagine a herd of live cattle (LC) showing up on your doorstep

RollOver & Expiration

- You **MUST** remember these dates, so you don't take delivery
- Expiration is the 3rd Friday of the 3rd month: expiration month (HMUZ)
- RollOver is the Thursday of the prior week
- Traders rollover on this Thursday and begin trading the “front month”

RollOver Thursday

- I have it on Repeat forever on my phone, with an alarm
- I also have an indicator
- You simply close the contract you are in and buy/sell the next one

TASC: Technical Analysis of Stocks & Commodities

- S&P 500 E-Mini is usually the most liquid
- 10-Yr T-Note next
- Nasdaq E-Mini is down at 7th
- YM is at 19th
- Don't buy something you can't sell!

FUTURES LIQUIDITY

Trading liquidity is often overlooked as a key technical measurement in the analysis and selection of commodity futures. The following explains how to read the futures liquidity chart published by *Technical Analysis of Stocks & Commodities* every month.

COMMODITY FUTURES

The futures liquidity chart shown below is included to rank publicly traded futures contracts in order of liquidity. Relative contract liquidity is indicated by the number of dots on the right-hand side of the chart.

This liquidity ranking is produced by multiplying contract point value times the maximum conceivable price motion (based on the past three years' historical data) times the contract's open interest times a factor (usually 1 to 5) for low or

very high volumes. The greatest number of dots indicates the greatest activity; futures with one or no dots show little activity and are therefore less desirable for speculators.

October 1987

All futures listed are weighted equally under "contracts to trade for equal dollar profit." This is done by multiplying contract value times the maximum possible change in price observed in the last

three-year period. Thus, all numbers in this column have an equal dollar value.

Columns indicating percent margin and effective percent margin provide a helpful comparison for traders who wish to place their margin money efficiently. The effective percent margin is determined by dividing the margin value (\$) by the three-year price range of contract dollar value, and then multiplying by one hundred.

STOCKS

Trading liquidity has a significant effect on the change in price of a security. Theoretically, trading activity can serve as a proxy for trading liquidity and equals the total volume for a given period expressed as a percentage of the total number of shares outstanding. This value can be thought of as the turnover rate of a firm's shares outstanding.

Trading Liquidity: Futures

Commodity Futures	Exchange	% Margin	Effective % Margin	Contracts to Trade for Equal Dollar Profit	Relative-Contract Liquidity
S&P 500 E-Mini (Jun 21)	CME	2.2	14	3
10-Year T-Note (Jun 21)	CBOT	3.2	16.8	19

More About Futures

- When trading stocks, you pay the value shown on the quote
- GOOGL costs \$2,381 per share
- MSFT costs \$247 per share
- Unless you have a margin account where you trade on borrowed money, there is no leverage
- But, futures are leveraged

Futures Margin Rates

Futures Margin Rates

Due to market volatility, margin rates are subject to change at any time and posted rates may not reflect real-time margin requirements. Information furnished is taken from sources TradeStation believes are accurate. TradeStation is not responsible for any errors or omissions. All margin calls must be met on the same day your account incurs the margin call. Margins are subject to change and/or revision at any time without prior notice. Please consult the trade desk about your account status, to request the most current rate, or for any additional questions you might have regarding margin.

[INDEXES](#) [EUREX](#) [EURONEXT LIFFE](#) [CURRENCIES](#) [INTEREST RATES](#) [METALS](#) [ENERGIES](#) [AGRICULTURE](#) [MEATS](#) [SOFTS](#) [OTHER](#)

Description	Symbol Root	Initial Margin	Maint. Margin	Day Trading Rate
Indexes				
E-MINI S&P 500	ES	\$12,100	\$11,000	25% of initial
E-MINI MIDCAP 400	EMD	\$14,850	\$13,500	NONE
E-MINI NASDAQ 100	NQ	\$17,600	\$16,000	25% of initial
MINI RUSSELL 2000 (CME)	RTY	\$7,150	\$6,500	25% of initial
MINI DOW JONES (\$5)	YM	\$9,900	\$9,000	25% of initial
MICRO ES	MES	\$1,210	\$1,100	25% of initial
MICRO NQ	MNQ	\$1,760	\$1,600	25% of initial

How Much Is One Share?

- The S&P E-Mini is at \$4,200
- There are 500 stocks in the index
- $500 * \$4,200 = \$2,100,000$
- So, for \$12,100 you are controlling over \$2 million
- That's just 0.6% you have to put up
- Steep leverage

Aren't Futures Risky?

- People think that since futures are leveraged you can lose all your money
- Since you are so highly leveraged, you could lose a lot
- If you don't have enough money in your account to cover a loss
- You will have a margin call
- You can lose more than is in your account

Margin Call

- The broker will call you or send you a notice by email that you have a margin call
- And must bring the account back over the margin rate within (24) hours
- If you are sitting on a losing trade this could amount to a lot of money

How Much Can I Make?

- The S&P E-Mini is traded at \$12.50 per tick or \$50 per point
- That means if it's trading at 4,200 and it goes to 4,201 (and we are long) we make \$50.
- Next, I'll show you a real live short trade

A Short Trade

Does the S&P 500 Ever Go to Zero?

- It hasn't in the 40+ years I've been trading
- If the world came to an end?
- But then you'd have worse problems
- The biggest drop I've experienced was 1,186 points during the Covid Crash, and I was short!
- BUT remember, you can't Hold On To a futures trade waiting for rebound

You'll Have to Give It Up

- Why can't you hold it forever? (Until it turns around)
- Because it expires every 3 months
- What if the rebound takes a year?

Trading Limits

- There are limits in place to avoid crashes
- From Investopedia:
- A daily trading limit is the maximum price range limit that an exchange-traded security is allowed to fluctuate in one trading session. Limit up is the maximum amount a price is permitted to increase during one trading day. Limit down is the maximum permitted price decline occurring over one trading day. Trading limits are examples of circuit breakers—interventions employed by exchanges to help maintain orderly trading conditions during turbulent markets.

So Now That You Know It's Risky

- I'll show you how I trade
- And have been for 40+ years
- I'll even sell you my strategies and
- Teach you exactly how I trade them
- It's the same that made me #1 trader years ago

How I Personally Trade

- The 1st things I put on any chart I look at are Attractors
 - I coined the term to describe all kinds of S&R including MAVs where price tends to revert to the mean
- The next thing I put on a chart is my SunnyBands indicator
 - It is based on my DynamicMovingAverage (gold & purple lines) in the center of the bands

How I Trade: Attractors

How I Trade: SunnyBands

How I Trade: DMA

- The DMA crossover is the macro clue
- But it isn't early enough for me
- So, I created SunnyBands which is faster
- Then I created DMA_Histogram (DMA_H) which is even more precise

How I Trade: SB & DMA_H

Look at the DMA_H Turns

That's all there is to it

- I look at the Attractors
- I look at VantagePoint (watch their FREE video)
- I study the DMA
- and the SunnyBands
- I trade the eMini on 1-min & 5-min charts
- I trade many times a day
- With equities, I buy and hold for weeks to months

Next Step

- With SunnyBands and my DMA_H on a 1-minute chart, I add a 5-minute chart to show me the “long-term” trend
- This is tricky, so refer to my [YouTube channel](#) to put 2 SunnyBands with 2 datastreams on one chart

(Help is on YouTube)

The image shows a screenshot of a YouTube channel page for Sunny J. Harris. The channel has 70 subscribers. The page displays a list of uploads, including:

- ReceivingAndInstallingIndicat**: 98 views • 5 years ago
- BingTicksVideo**: 143 views • 6 years ago
- Some Days You Don't Win**: 142 views • 6 years ago
- How to Overlay 2 Different Timeframes on One Chart**: 2.9K views • 7 years ago
- TSME_DisData.Download2014**: 71 views • 7 years ago
- How To Use: Sunny Harris's Indicators Lesson 1**: 793 views • 8 years ago

The left sidebar shows navigation options: Home, Explore, Subscriptions, Library, History, Your videos, Watch later, Sprinklers, Liked videos, and a list of subscriptions including Mashable, Colleen Ballinger, and Miranda Sings. The top navigation bar includes the YouTube logo, a search bar, and various utility icons. The background of the channel banner features a colorful geometric pattern.

2 Datastreams, 2 SunnyBands

It also works on longer time frames

On any symbol

The Last Piece of the Puzzle

- Every night, before I put away my trading tools and go to bed,
- I consult VantagePoint-ai software to get a clue to where the market might go tomorrow
- The gray bar at the right on the VP Chart shows tomorrow's forecast

VantagePoint Prediction

In Summary, My steps are:

- Look at [VantagePoint](#) prediction
- Draw Attractors on charts
- Place SunnyBands on charts
- Place DMA_H on charts
- Read the signals
- Take trades
- Make Money
- Can't be any more disciplined than that!

I Released the NEW moneymentor.com

- Last week I launched my newly re-designed and programmed www.moneymentor.com
- It has been active since 1995
- It seriously needed an overhaul
- You will be amazed how many trading tools & resources are available there

The ALL NEW MoneyMentor.com

Education is NOT Expensive;
Lack of Education IS!

Indicators & Strategies

We provide a wide range of software programmed by Sunny for her own trading. She makes these unique products available to help others in their quest for profits. The software includes indicators that make trading smooth and easy, and strategies that can even be automated to provide hands-off trading. [Click here for a full list](#), descriptions, sample charts and prices. [BUY NOW](#).

Consulting Services

Sunny has been programming for others and teaching others to trade almost as long as she has been trading. Helping struggling novice & intermediate traders over the hurdles is a passion of hers. Sunny has won awards for her teaching and consulting, being #1 in several categories. Sunny can teach you how to use [TradeStation](#), [MultiCharts](#) and [EasyLanguage](#) as well as [MetaStock](#), [TC2000](#), [VantagePoint](#), and more so you don't spend months struggling on your own. If you have a concept you want programmed, she can do it for you or teach you how to do it yourself. [BUY NOW](#).

My Products

- The products I have were all developed for my use in my own trading
- I make them available to you
- I show you exactly how I use them
- Look at [moneymentor.com/order_Form.html](https://www.moneymentor.com/order_Form.html)
- I don't hold anything back

CONSULTING, COACHING & MENTORING

Ask all the questions you want; have Sunny lead you down the paths to success. After 30+ years of trading and research, she's been through it all. "Nothing teaches better and faster than making mistakes -- and I've made my share." Even so, **EDUCATION IS MUCH CHEAPER THAN DRAWDOWN!**

Click here to read our [Consulting flyer](#) or our [Education flyer](#). Click here to see what [other people say](#) about Sunny's products. Here's just one example: "It's been a pleasure working and meeting with you. Since our meeting the strategies have produced 10 positive trades in a row."

I only take **serious** students. If you are a tire kicker, not really ready to pursue a career of trading, kick somewhere else.

CONSULTING / MENTORING HOURLY: NOTE: Minimum charge: \$495; Minimum consulting time: 1 hour.

1 hour	1 hour OLD PRICE: \$865.00 NEW PRICE: \$495.00* (\$495.00 /hr)
5 hour package	5 hours OLD PRICE: \$4,030.00 NEW PRICE: \$2,227.50* (\$445.50 /hr)
10 hour package	10 hours OLD PRICE: \$7,815.00 NEW PRICE: \$3,960.00* (\$396.00 /hr)

NOTE: The more hours you buy, the less they cost. Look at the hourly equivalent for 10 hours versus 1 hour.
